

EUROPROwebs labelling and tagging¹

The verbal component of the H2020 websites selected was downloaded and saved into txt-format documents, both as a document corresponding to the whole content of the website (labelled NAMEOFTHEPROJECT) and as documents corresponding to common web sections or pages labelled HOME, ABOUT, PARTNERS, WORK and NEWS, regardless of the menu name.

The tagging of our corpus was carried out at two different levels.

1. **Manual tagging:** A number of tags was determined in the light of the texts downloaded and saved: <hyperlink>, <image>, <video>, <table>, <graph>, <map>, <presentation>, <questionnaire>, and <language>. The whole corpus was thus annotated.

The MIGRATE Members

The Transmission System Operator (TSO) TenneT is the project coordinator of MIGRATE.
Together with 23 other partners (10 TSOs, 12 Universities/Labs and 1 manufacturer) of the
consortium the research and investigation will be done.

```

Example of EUROPROwebs pilot manual tagging.

2. **Semi-automatic tagging:** Depending on the research aims, different tagging at the lexico-grammatical, discursive or pragmatic level was devised using the software NVivo.

```

Cefic (European Chemical Industry Council) is the Brussels-based organisation
representing the European chemical industry. Cefic represents, directly or indirectly,
about 29,000 large, medium and small chemical companies, which employ about 1.2
million people and account for nearly a third of world chemical production. Cefic was
incorporated in 1972 as an international association with scientific objectives. Cefic
addresses key issues of global importance, such as: Competitiveness, Research &
Innovation, High Level Group on Chemicals, EU Chemicals Policy, International Trade,
Climate change & Energy, etc.

CEMBUREAU is the European Cement Association based in Brussels and represents
national cement industry associations and cement companies from the European
Union (except Cyprus, Malta and Slovenia) plus Norway and Switzerland, before
European and national governments.

Example of EUROPROwebs pilot semi-automatic tagging

¹ We would like to acknowledge the work of our research fellows Daniel Pascual and Rosana Villares, members of the CIRES research group, in the compilation of EUROPROwebs pilot.

EUROPROTweets labelling and tagging

The verbal component of the tweets from 20 research project websites linked to a Twitter account (out of the 30 websites selected for EUROPROwebs pilot) was downloaded and saved into a txt-format document corresponding to each account labelled NAMEOFTHEPROJECT_T.

The tagging was carried out as follows:

1. **Manual tagging:** A number of tags was determined in the light of the texts downloaded and saved: <hyperlink>, <image>, <video> and <language>. The whole corpus was thus annotated.

Hammerschmid, <mention>@kaiwegrich1</mention> <mention>@EU_H2020 project</mention> “TROPICO” to research <hashtag>#egovernance</hashtag>, <hashtag>#digitalisation</hashtag> in public sector. <link>https://t.co/fjx6F94B68</link><ext> <link>https://t.co/Yy5kEilsbL</link><ext>

Do formal rules limit or foster <hashtag>#collaboration</hashtag> in and by governments? Insights on the alleged “maze of rules” and <hashtag>#DigitalTransformation</hashtag> in public sectors from 10 European countries available now: <link>https://t.co/6XR4oRGcn3</link><int>
